

CineFiles is a database of reviews, press kits, festival and showcase program notes, newspaper articles, and other documents from the PFA Library's collection. The collection contains documents from a broad range of sources covering world cinema, past and present. CineFiles currently includes materials on the films of over 145 directors whose works have been featured in PFA's exhibition program. When retrospective indexing is complete, the CineFiles database will hold over 200,000 documents. New titles and document images are added daily.

UC Berkeley's Museum Informatics Project provides database design, database management support and software maintenance for CineFiles.

This project is supported in part by grants from the National Endowment for the Humanities; the U.S. Institute of Museum and Library Services under the provisions of the Library Services and Technology Act, administered in California by the State Librarian; and the Packard Humanities Institute, as well as by individual donors.

Resources for Educators

Themed Collections

This collection contains recommendations for films organized by themes culled from the California Content Standards. The themes have been adapted to a broader framework, so that the collection can be useful to all educators. Click on the title of the recommended film to access the documents.

Curriculum Guides

In this section, you will find guides to the resources in our database for a small number of films. They are intended as models of how we think the resources on this website can be used to enrich the classroom viewing experience. We hope to expand this section in the future.
